

Grahamtown Schoolhouse
AL-V-A-145
Walnut Street, Grahamtown
1880's

The most ornate of the county schoolhouses built in the latter half of the nineteenth century is the Grahamtown Schoolhouse. It was built during the 1880's on land conveyed to the county by Curtis M. Graham. Graham showed his cultural awareness in the design of his 1871 Victorian Revival Mansion located nearby, and probably was influential in the Roman Doric design of the schoolhouse.

The attractive portico includes a monumental pediment supported by six wooden Roman Doric columns. The entrance is surmounted by a semi-elliptical tracery fanlight and is flanked by tracery side lights. Each of the sidelights is between engaged fluted Ionic columns which support a small cornice.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Grahamtown Schoolhouse is located on the northeastern side of Walnut Street in Grahamtown.

The building consists of a "T" shaped one story thirteen bays wide frame structure with german siding covered with asbestos shingles flanged at the foundation. It rests on a high foundation of random rock faced ashlar stone with a plain water table. The hipped gable roof is covered with asphalt shingles. Eaves consists of a boxed cornice, soffit, bedmould and frieze. One interior brick chimney with a corbeled cap is original. Windows are wide nine over one lights with wooden lugsills. Three entrances are on the rear of the building, one has a transom.

The main entrance is in the center of the southwestern facade recessed under a full height Roman portico. The entrance includes a moulded semi-elliptical fanlight with tracery, sidelights with tracery each surrounded by small, engaged, scrolled Ionic columns, with mouldings, which support a cornice over each of the side lights. The door is of two panels and one light with original hardware. The pediment is supported by six plain and slightly tapered Roman Doric columns, two of them engaged. The monumental pediment includes a boxed cornice, soffit, and frieze with a bedmould and simple brackets. The face of the pediment contains on oval lunette with wide wooden moulding with a wooden "keystone".

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The public school system of Allegany County was established in 1865.(1) During the 1870's schoolhouses were built in almost every village of the George's Creek mining region. These schoolhouses were usually built on land donated by mining companies. (2) The property on which the Grahamtown Schoolhouse was erected was conveyed to the Board of School Commissioners by Curtis M. Graham in 1882. (3)

Graham, who showed an excellent taste for architecture in his Victorian Revival mansion built in 1871, was probably influential in the Roman Doric design of the schoolhouse. (see AL-V-A-014) It is unlike any other schoolhouse built in the county during the latter half of the nineteenth century. The attractive portico with a monumental pediment is supported by six wooden Roman Doric columns, two engaged. The entrance consists of a semi-elliptical tracery fanlight and tracery sidelights. Each sidelight is located between engaged fluted Ionic columns, which support a small cornice. The schoolhouse stands as a reminder of the cultural awareness of past citizens of Allegany County.
